

You put a crisp bag in the Recycle Bin?

We all do our best to recycle but are we doing it right? It's hard to know when it's not the most important thing on everyone's to-do list. Here are a few up-to-date tips on what should and should not go in your recycling bin...

You should **NEVER** put any of these items in your recycling bin...

- Any soiled packaging
- Nappies
- Food waste
- Plastic film & netting
- Foil containers or crisp bags
- Crisp tubes

Plastics with recycling codes **1, 2 & 5** are **fully recyclable** and should be put in the recycling bin. These codes are located at the base of all plastic containers.

Make sure bottles are empty by **discarding all liquids**

Rinse packaging that contained food for example yogurt, margarine, condiments, soup containers

Squash all plastic bottles & pop the tops in separately, **flatten** all cardboard

Did you know lids from jars are **recyclable**!
