1 INTRODUCTION

This report presents the draft bye-laws for the recommended speed limits on National Roads in County Limerick, which are being made by Transport Infrastructure Ireland (TII) following a detailed review and assessment in accordance with the DTTAS Guidelines for Setting and Managing Speed limits in Ireland (March 2015). The draft bye-laws as presented are to be considered by Limerick County Council for inclusion/adoption in their consolidated set of Bye-Laws for their county as part of the ongoing national speed limit review and update.

Section 2 of this report presents draft wording for each Bye-Law in the order that they are encountered on each of the National Routes in the county. Section 3 repeats the same information but presents it in separate draft Schedules (per each Speed Limit increment) as they might appear in the consolidated set.

As discussed during the consultation process, these draft Bye-Laws are not definitive, in that they are based on the maps developed under the speed limit review for National Roads, and they have not been prepared with the same level of local knowledge that the Local Authority would have (e.g. references to locally known road names, townland areas, etc.). For this reason, we advise that these draft Bye-Laws should be reviewed and checked by Limerick County Council. To assist with this review a number of items have been highlighted (in yellow) that require specific Local Authority input.

Finally, where TII speed limit recommendations do not fully accord with the view of the Local Authority during the consultation stage, the draft bye-law text has been *italicised*.
