

The noise maps for Limerick can be viewed at <https://gis.epa.ie/EPAMaps/>

When you enter the site, click on “Environment and Wellbeing” and then click on “Noise” from the drop down menu.

This will give you a number of layers which you can turn on and off. The only ones relevant to Limerick are Noise Round 3 Road Lden* and Noise Round 3 Road Lnigh**. Turn on one of these layers at a time.

Once you have turned on a layer, zoom into the area you are interested in. They click on the “layers” symbol on the left hand side.

Finally, click on the cog symbol beside the layer on/off button and this will give you the legend for the noise mapping and will also allow you to change the transparency level.

*Lden is the average of the 24 hour noise levels (day, evening night)

**Lnigh is the average night time noise levels.
