RE: Material Alterations to the proposed Croom Local Area Plan 2020 - 2026

Dear Sir / Madam,

Irish Water acknowledges receipt of your email in relation to Material Alterations to the Croom Local Area Plan. In addition to Irish Water's submission of 19th September 2019, we wish to make the following comments/ updates:

Available information indicates the new residential site, site No 7 per the Serviced Land Assessment, can be serviced. The trunk sewer passing through the site is to be protected and access maintained.

In relation to the text regarding water supply on page 9 of the SEA Screening, Irish Water are proceeding with the development of a new borehole at the Croom Bypass site which will be completed this year. The National Water Resources Plan Full Options Assessment will be carried out in 2020 and will inform future plans to supply Croom. At present, there are no plans for a new reservoir at the water tower site in Croom.

Irish Water is available for discussion in relation to the future sustainable development of the area and any other issues with respect to the provision of water services within our remit.

Yours Sincerely,

~~Kevin Pender~~
