

Meeting of the Metropolitan District of Limerick

to be held on 16th October 2023

Question submitted by Councillor D. McSweeney

I will ask at the next meeting of the Metropolitan District of Limerick for the following information in relation to Patrickswell Village Renewal Scheme:

- a) How many car parking spaces were planned for the second phase of Patrickswell Main Street in the original Part 8 planning application as approved in September 2016.
- b) How many car parking spaces were delivered on the Main Street as part of the second phase
- c) What plans do Limerick City and County Council have to provide the number of car parking spaces that were removed from the scheme approved by the members.
- d) As Patrickswell Village Renewal Scheme is now completed it must be noted a commitment was given in the CE report to the members to enhance the lighting around "The Well" to date this has not occurred can it be advised when this will be completed.
- e) The Active Travel team do not consider the moving and increasing the size of the roundabout and the installation of deflection islands at the Enterprise Centre to be material please advise under law the definition of material changes.
- f) As part of the scheme a raised junction and two raised crossings were included that were not contained in the original Part 8 drawings please advise how these were included contrary to what was approved by the members.
- g) Provide a full list of any further variations that were made by the Active Travel Team contrary to the original Part 8 application.

Response:

To answer a, b, c above, it is important to also consider the parking provision prior to the scheme being progressed. A sheet detailing the parking available prior to the scheme, that proposed at Preliminary Design/Statutory Approvals stage and those delivered at construction is appended.

The sheet also provides detail on the change in number of parking spaces from the Part 8 drawings and the reason for any reduction in spaces, where applicable. It is considered that the number of spaces provided along with the additional surfacing of the carpark adjacent to Marian Park result in an appropriate number of spaces for the village demand with adequate parking available within a short walking distance of the village core.

d) The Well is within Phase 1 of the scheme and outside the remit of the current contract and the Active Travel / NTA funded scheme. However, Active Travel will engage with the Operations / Placemaking Departments to ensure this commitment is acted on.

e) There is no legal definition of material changes, it is interpreted on a case by case basis. The detailed design and delivery stage of this improvement scheme recommended some changes including the location of the roundabout within the context of the existing public road. The changes were made within the spirit of the overall scheme, for genuine reasons and considered necessary for the safety of all road users.

f) A raised crossing at the Marian park junction was included at Part 8. A raised table has been introduced across the junction in line with current design advice (DMURS Section 4.4.7). The raised table reduces traffic speed at a busy junction within the village core.

A pedestrian crossing point close to the Circle K shop was upgraded from an uncontrolled crossing to a raised zebra crossing to provide a safer crossing location within the village. This is the only controlled crossing within the village. A raised crossing was also provided at the west of the roundabout to provide a safer crossing location for pedestrians and also to provide traffic calming on the approach to the roundabout.

g) During the detailed design and constructions phases of the project, a number of modifications were made to the Preliminary Design layouts presented at Part 8. These included issues contained in the Part 8 responses but not reflected in the drawings such as the increased road width from 6.0m to 6.5m and provision of disabled parking spaces etc.

In addition to these, a number of modifications were made to the design as follows:

- Reduced paving to Belgard Road – paving width was reduced to retain some green space and extent was reduced due to condition of the existing paths.
- Provision of two bus stops and shelters within the village core were included to provide better access to public transport.
- Additional seating, bins, bollards to prevent parking on paving and landscaped areas and improved landscaping designs and installations were provided. More than 50 trees are being provided for in Phase 2

Some additional elements added to the scope of the construction were installation of permeable paving to the community centre plaza area (separate planning), extension of the road upgrades to include access road to the graveyard, surfacing of the existing carpark at Marian Park and adjustments to drainage and paving within previous Phase 1 area

See attached – Parking Review table

Sinead Kennedy, S.E.E.

Active Travel,

Transportation & Mobility Directorate

12th October, 2023

Meeting of the Metropolitan District of Limerick to be held on 16th October 2023

Patrickswell Phase 2 Parking Review

Location		Prior to Scheme (formal parking)	Part 8 Parking *	Construction Stage#	Change	Reason for Change from Part 8 drawings
Ch 0 - 75	LHS	Hard shoulder - no formal parking area. Limited width and several entrances.	8	8	0	No change
Belgard Grove		6-8 (not marked)	8		0	Outside of Phase 2 works extent - spaces have been provided separately.
Ch 375 - 425	LHS	Wide area of hard shoulder used for parking but multiple entrance / sightline issues.	3	3	0	No change. Note recent planning application at appeal with ABP included removal of these 3 spaces.
Ch 25-100	RHS	Hard shoulder, used for parking but widths less than required along much of this section (<2.1m)	7	7	0	No change
Ch 100-150	RHS	Hard shoulder, used for parking. Space for 6 cars at 2.1m width. Sightline requirements for crossing not allowed for.	6	4	-2	A raised crossing has been provided with associated sightline requirement. Due to location of crossing and sightline requirements, 2 spaces were omitted. Also note DMURS preference for breaking up of parking bays to reduce visual impact.
Ch 175-200	RHS	Hard shoulder, width varies. Parking here would be either part footpath or part on road.	8	9	+1	

Ch 250 - 300	RHS	Hard shoulder, width varies. Parking here would be either part footpath or part on road.	9	7	-2	A bus-stop has been provided at this location and at detailed design the requirements for distance from junction and sightline were addressed. These resulted in design amendments, which reduced parking by 2 spaces.
Ch 350 - 425	RHS	Hard shoulder, width varies. Not sufficient for parking off footpath without parking partly on road.	16	8	-8	There are a number of issues which resulted in amending this parking from perpendicular parking to parallel parking. These include DMURS advice that parallel parking should be provided on regional roads, safety implications of perpendicular parking close to a roundabout exit, reduced width available with road width of 6.5m retained. There is no high retail demand at this end of the village with one house and a public house (with parking available to the rear) immediately adjacent. The parking provided here is considered to be appropriate to the location, adjacent usage and parking demand.
Overall Change					-11	

* Note: Part 8 drawings were based on 6.0m carriageway with a commitment given in Part 8 responses that 6.5m would be provided to accommodate agricultural and commercial vehicles.

Meeting of the Metropolitan District of Limerick to be held on Monday 16th October 2023.

Question submitted by Councillor D. McSweeney

I will ask at the next meeting of the Metropolitan District of Limerick, following the commitment given by the Director of Planning, Environment and Place-Making in November 2022 to consider a pilot upgrade of a lane way in the City Centre, what progress has been made to date.

Reply

Place Making Team has prepared a draft report on city centre streets and laneways. This is currently being reviewed by LCCC Transportation and Travel Directorate. In order to access funding the Council is required to adhere to public spending code. When funding is approved a pilot project can be progressed.

MEETING OF THE METROPOLITAN DISTRICT OF LIMERICK TO BE HELD IN 16TH OCTOBER 2023

Question submitted by Councillor E. Secas

I will ask at the next meeting of the Metropolitan District of Limerick if the Report on the extension of the Castleconnell Playground has been completed and is available yet.

Response

It is proposed to extend the existing playground in Castleconnell. This project is progressing in Q4 of this year with the appointment of a Consultant to progress the project.

MEETING OF THE METROPOLITAN DISTRICT OF LIMERICK TO BE HELD IN 16TH OCTOBER 2023

Question submitted by Councillor E. Secas

I will ask at the next meeting of the Metropolitan District of Limerick for an update on the progress made to-date to provide a dog park in Castletroy Park.

Response

An area has been identified for a Dog Park in Castletroy Park. A framework of contractors has been set up to undertake works such as this. A funding source will need to be identified before this project can proceed.

Meeting of the Metropolitan District of Limerick

to be held on 16th October 2023

Question submitted by Councillor C. Slattery

I will ask at the next Meeting of the Metropolitan District of Limerick, in relation to Lynwood Park Laneways, I have tried on many occasions to get Limerick Council to clean up these lanes but have failed. These lanes are gated lanes but the residents who requested these lanes to be gated are now deceased or elderly and cannot clean up these laneways. The laneways are now overgrown and rat infested etc. Can the Council take these lanes in charge again please. There is a similar lane in Granville Park that also needs to be taken in charge. We need to support our elderly people who no longer can do the up keep of these lanes.

Response:

The laneways in Lynwood Park are currently not in council charge and therefore are not in Limerick City and County Council's remit to maintain. Any request to take a private laneway into council charge should be requested through the Planning department. A budget would be required to upgrade the laneway(s) in question to the necessary standards and to also regularly maintain when required.

Mike Richardson

Meeting of the Metropolitan District of Limerick

to be held on 16th October 2023

Question submitted by Councillor C. Slattery

I will ask at the next Meeting of the Metropolitan District of Limerick, can the Active Travel Team and the Roads Department consider funding for Knockea National School so a safe route to school can be provided to the children and parents attending the school.

Response:

The Safe Routes to School Programme was launched in March 2021 and every school in Ireland was invited to submit an expression of interest to participate in the initiative. Knockea National School did not make an application to be part of the programme.

29 schools in Limerick applied to be part of the Safe Routes to School programme. We are currently working with schools in Limerick who are on Round 1 and Round 2 of the programme. Once these schools have been supported, then subsequent schools will be brought onto the programme from the existing waitlist.

The programme is funded by the Department of Transport through the National Transport Authority (NTA) and is supported by the Department of Education. An Taisce's Green-Schools is coordinating the programme. Limerick City and County Council assists on the delivery of this programme through design and delivery of the infrastructure.

If the programme reopens for new applications in the future, the school would be eligible to apply. In the short term we can relay the query to the local area office to determine whether the concerns can be addressed at local level outside the formal Safe Routes to School programme.

Meeting of the Metropolitan District of Limerick

to be held on 16th October 2023

Question submitted by Councillor C. Slattery

I will ask at the next Meeting of the Metropolitan District of Limerick, can the Council put in place a scheme to alleviate flooding under the bridge on the R512 towards Crossagalla, because in the bad weather the area becomes impassable causing traffic chaos in the area. This road is a main throughfare into the City and needs to be upgraded.

Response:

Following reports of flooding on the R512 road carriageway under the existing railway bridge adjacent to the Killmallock roundabout, Limerick City and County Council Roads Department has completed a drainage survey of the stormwater network in the area and recently commenced initial consultation with Irish Rail to determine a solution to this issue. Drainage improvement costs are currently being compiled and a funding source will be examined in due course.

Meeting of the Metropolitan District of Limerick

to be held on 16th October 2023

Question submitted by Councillor C. Sheehan

I will ask at the next Meeting of the Metropolitan District of Limerick for an update on the local authorities plans to upgrade O'Dwyer Bridge on Athlunkard Street and if a bridge restoration grant has been applied for.

Response:

Limerick City and County Council Road's Department has recently acquired funding to complete painting and cleaning upgrade works to O'Dwyer Bridge on Athlunkard Street. An Appropriate Assessment screening process is currently underway which will be followed by a tender process to appoint a suitable and competent contractor to complete the works involved.

METROPOLITAN DISTRICT OF LIMERICK

MEETING TO BE HELD ON MONDAY, 16TH OCTOBER, 2023

Question submitted by Councillor J. Pond

I will ask at the next Metropolitan Meeting that Limerick City and County Council write to An Post, requesting them to reinstate the Post Box that was removed from the centre of Castleconnell Village when the Post Office was relocated.

Reply:

Decisions on the location of Post Boxes are operational decisions made by An Post. Limerick City and County Council does not have any involvement in the process where decisions are made on where post boxes are located. However this request can be forwarded on to An Post for consideration.

**MEETING OF THE METROPOLITAN DISTRICT OF LIMERICK TO BE HELD ON MONDAY, 16TH
OCTOBER 2023**

Question submitted by Councillor J. Pond

I will ask at the next Meeting of the Metropolitan District of Limerick for an update on progress for the delivery of the much-needed proposed Library for the greater Castletroy area.

REPLY:

A new public Library requires significant planning and resources, both capital and revenue.

The first step was to include the need for a library for Castletroy in the City and County Council's 5 year Library strategic plan which was launched in June 2021.

Following this, we undertook a process to identify a suitable site to meet the requirements for this rapidly expanding area of Limerick.

We have identified two potential sites in Council ownership directly behind the Castletroy Shopping Centre and adjacent to both primary and secondary schools.
The identification of a site is a key milestone in advancing this important project.

Further progress will be set in the context of available funding both Local and National, therefore we are not in a position at this stage to have a definite timeline for delivery.

In the interim the current mobile library service in Castletroy has been extended to meet current demand.

Damien Brady
City & County Librarian

Question submitted by Councillor E. O'Donovan

I will ask at the next Meeting of the Metropolitan District of Limerick for an update on the removal of temporary railings around derelict sites on Parnell Street and Hartstonge Street.

Response

Dangerous Structure at 10 Hartstonge Street.

A Local Government (Sanitary Services) Section 3 notice has been served on the alleged Owner in November 2021. Additionally the Derelict Sites team has issued a Derelict Sites Section 15 notice to compulsory purchase the property. The alleged owner has appealed this order to An Bord Pleanála. We are currently awaiting the outcome of the appeal before we can progress this case.

Dangerous Structure at Parnell Street.

Planning permission was granted for the development of this site in May 2022 and it was expected that this would result in activity on the site and removal of the roof structure. Unfortunately as there was no engagement in relation to the progression of the development, so a further Local Government (Sanitary Services) Section 3 notice has been issued to the owner requiring them to remove the hazardous roof by the 3rd of November 2023. This will then allow for the removal of the fencing. Noncompliance with the section 3 notice will result in initiation of legal proceedings.

Meeting of the Metropolitan District of Limerick

to be held on 16th October 2023

Question submitted by Councillor E. O'Donovan

I will ask at the next meeting of the Metropolitan District of Limerick of the protocol around collecting debris and branches from tree/hedge cutting and to ask for the debris from recent hedge cutting in Raheen to be removed from footpaths and cycle lanes.

Response:

Contractors and landowners carrying out tree/hedge cutting should ensure that all debris is removed from footpaths, cycle lanes and carriageways following works. In the Raheen area any cutting carried out by contractors working for the Council normally takes place at night to minimise disruption and the cleaning of debris by the contractor normally takes place in the following days during daylight hours.

The Council's contractor has returned to the Raheen area and has removed the debris associated with their works. The contractor will be reminded to ensure that debris is removed promptly.

MEETING OF THE METROPOLITAN DISTRICT OF LIMERICK TO BE HELD IN 16TH OCTOBER 2023

Question submitted by Councillor S. Novak Uí Chonchúir

I will ask at the next Meeting of the Metropolitan District of Limerick when the Climate Action Plan will be published by Limerick City and County Council.

REPLY:

Limerick City & County Council –

The Climate Action Plan is to be adopted by the Council by 28th February 2024. The draft Plan is currently being prepared and is anticipated to be published for public consultation in early November for a period of 6 weeks.

Aidan Finn
Senior Engineer
13th October 2023

Meeting of the Metropolitan District of Limerick

to be held on 16th October 2023

Question submitted by Councillor S. Novak Uí Chonchúir

I will ask at the next Meeting of the Metropolitan District of Limerick if there are plans to designate areas for car sharing and enable for and/or install electric charging points in those areas.

Response:

Following an initial pilot scheme in collaboration with GoCar Ltd., there are car-share options currently available at the following locations in Limerick:

Location	Number of Vehicles
University of Limerick (EV)	1
Parkway Shopping Centre (GoCar reserved spaces), Limerick	2
Europcar - Ennis Road, Limerick	2
Limerick One Shopping Centre	2
Circle K Dock Road (near St Alphonsus St), Limerick	2
Gerald Griffin Street Limerick	1
Barrington Street, Limerick	1
The Bishops Quay	1
Charlotte's Quay Limerick	1
O'Callaghan Strand Limerick	1
Clancy's Strand Limerick	1
Colbert Train Station, Limerick	2
Greenpark Shopping Centre, Limerick	1

Parkway Retail Park (by Homebase, car parked closed 10pm to 6am), Limerick	2
Total	20

The Council is currently preparing to regularise the future control of car-sharing services through the preparation of bye-laws and the formal procurement and award of a service provider contract(s). Proposals for the designation of expanded areas for car-sharing will be reviewed and agreed with the future service provider(s) once appointed.

As part of the on-going Electric Vehicle Charging, Civils Infrastructure: Phase I Project we are reviewing with ESB Networks the feasibility of providing for EV car-sharing facilities at possible city-centre and rural transport hubs such as Colbert Station in advance of procuring a car-share service provider(s). Development of additional EV car-sharing sites may also be carried out in conjunction with an appointed service provider(s) where feasible.

Meeting of the Metropolitan District of Limerick

to be held on 16th October 2023

Question submitted by Councillor S. Benson

I will ask at the next Meeting of the Metropolitan District of Limerick for an update on the introduction of ASD specific parking as per the adopted resolution of a motion on this topic last year.

Response:

We are continuing to review the basis for allocation of ASD specific parking in Limerick, We will revert with an update as soon as we have completed a detailed review on whether such a basis can be justified.

Meeting of the Metropolitan District of Limerick

to be held on 16th October 2023

Question submitted by Councillor Benson

I will ask at the next Meeting of the Metropolitan District of Limerick who is responsible for erecting the flood barriers around the quays in and if the Council could explain the mechanism for having these put in place and removed, and if they would provide an explanation around the service level agreement.

Response:

Limerick City and County Council Road's Department deploys flood barrier defences around the Limerick City Quay area during weather events when required based on information determined from a flooding forecast model. This model is prepared from various forecast information which includes Shannon Dock tide times, OPW's flood surge model, ESB's Shannon Level Forecast and Met Eireann's weather forecasts. This exercise is generally completed prior to and during significant weather events.

Limerick City and County Council Road's Department deploys flood barrier defences around the Limerick City Quay area during weather events when required based on information determined from a flooding forecast model. This model is prepared from various forecast information which includes Shannon Dock tide times, OPW's flood surge model, ESB's Shannon Level Forecast and Met Eireann's weather forecasts. This exercise is generally completed prior to and during significant weather events on the direct instruction of the District Engineers and once the base level defence are installed (normally in October) these base defences remain in place until the summer season unless an event is predicted\occurs.

MEETING OF THE METROPOLITAN DISTRICT OF LIMERICK TO BE ON MONDAY THE 16TH OF OCTOBER 2023

Question submitted by Councillor S. Benson

I will ask at the next Meeting of the Metropolitan District of Limerick, what the budget is for the Disabled Persons Grant for 2023, how much has been spent to date and if the Council could comment on why applicants, who submitted applications in June 2023, are being told that they will have to wait until 2024 for works "due to budget constraints for the DPG programme this year".

REPLY:

The Disabled Persons Grants scheme provides grant aid to people to carry out works on social housing stock to address the needs of older people or people with a disability.

Limerick City and County Council was awarded Grant Funding of €710,426.00 in May of 2023 for Disabled Persons Grant's.

This grant funding will provide for works in 57 social housing units.

Limerick City and County Council sought an increase to the awarded grant in June 2023 of €130,475.00 for applications that are currently on hand; this was approved in July 2023.

Limerick City and County Council has currently spent €577,199.65 of the awarded Grant and works are in progress to ensure the full grant allocation will be spent by year-end.

Limerick City and County Council is awarded a full year grant allocation based on a planned and approved programme of works in order to plan prioritise and implement the programme in a planned way throughout the year.

Local authorities can apply for additional funding from the Department of Housing, Local Government and Heritage for emergency cases as they arise throughout the year and this is considered on a case-by-case basis in respect of any new applications received throughout the year. The ability to accommodate additional works will be dependent on the scope and complexity of the works (and the needs of the applicant).

Mary Hayes
Senior Executive Officer
Housing Support Services
