& County Council

08/12/2023

ShareRidge Ltd are delighted to have been appointed as the contractors on the Mill Road Active Travel Project in Corbally. The project area will run from the Corbally road to the River Shannon Viewing area and will include offroad shared pedestrian and cycling facilities along with traffic calming measures. Our engineers have already started surveying and initial commencement works will begin in the coming weeks with a site compound, followed by localised enabling works.

A traffic management plan will be in place during the course of the works and any changes to it will be shared in advance via our weekly news bulletin.

Please see below image of initial surveying on site earlier this week.
