

Active Travel Scheme Mill Road

22/03/2024

This past week 19th to 22nd of March

Service installation of new ducts for ESB and street lighting has commenced from Scoil Ide heading North to towards the river.

Further sections of the foundations of the new wall were installed as well as excavation for the new footpath and cycleway.

The entrance wall and piers were removed at the Bishops Field and stored for reuse.

Works were carried out on the water main at the northern end of the job, which included lowering sections and relocating a fire hydrant.

Please see image below of works being carried out on lowering section of existing watermain.

08/03/2024

Next week 25th to 29th of March

The remaining section of foundation will be poured along with the foundations for the realigned entrance to the Bishops field. Installation of service ducting will continue from Scoil Ide heading North.

At the Northern end of the project, the water main has been lowered allowing the existing services to be exposed and protection slab poured in advance of the new road alignment.

We very much appreciate your patience and cooperation during this project.
