MEETING OF LIMERICK CITY AND COUNTY COUNCIL

TO BE HELD ON MONDAY, 26th May, 2025.

Notice of Motion submitted by Councillor M. Ryan

I will move at the next Meeting that Limerick City and County Council would install an averaging speed camera system on a trial basis, for example, in a village like Elton, on a regional road. This should be on a benefit analysis basis as a method to reduce speed while monitoring cost comparison, overall environmental and safety benefits for a community.

REPLY:

There are currently trials being undertaken nationally with respect to fixed speed cameras on both National and regional roads. Upon completion of these trials, the process and requirements with respect to the positioning of these camera shall be examined.

MEETING OF LIMERICK CITY AND COUNTY COUNCIL TO BE HELD ON MONDAY, 26th May 2025

Notice of Motion submitted by Councillor J. Scanlan

I will move at the next Meeting that our Authority liaise with the Refuse Operators servicing Limerick users with a view to making the offering provided more environmentally-friendly.

Response:

Under the current legislation authorised waste collectors are required to provide a three bin system to all their customers, but there is no way of restricting the number of collectors in any one area under this system. A year-long study has been commissioned by DECC on the “Feasibility of Transitioning Ireland’s Waste Collection Market from its Current Side by Side Licensing System to a Franchise Tendering System”. The independent study has just commenced and the scope includes environmental assessment of transport modelling and a 4-week public consultation on all aspects of the study has just commenced as per the link below
