PV arrays on ground-mounted metal frames, with a maximum overall height of up to 2.96 metres.

ii. Internal underground trenching, electrical cabling and ducting between the solar PV arrays and electrical inverter / transformer skid units.

iii. Up to 9 no. electrical inverter / transformer skid units.

iv. Construction and operational access to the site by 3 no. site entrances using existing field access points.

v. 2 no. temporary construction compound and ancillary facilities for the duration of the construction phase of the project.

vi. Provision of single storey substation control building of 217 sqm and associated works.

vii. 33kV collector cable network, joint bays and associated works.

viii. Internal access tracks, site landscaping and drainage works, security fencing, CCTV and all associated ancillary site development works.

ix. The decommissioning and reinstatement of the solar farm at the end of its operational life.

The elements of the Proposed Project located in Co. Limerick, as described above in i – ix, are the subject of this planning application. The remaining elements, including the construction of 524,178 sqm of solar PV arrays on ground-mounted metal frames, with a maximum overall height of up to 2.96 metres, internal underground trenching, electrical cabling and ducting between the solar PV arrays and electrical inverter / transformer skid units, up to 20 no. electrical / inverter transformer skid units, construction and
