Weekly Bulletin

8th May 2026

Over the past two weeks ShareRidge have completed trial holes along the roadside adjacent to St Pauls nursing home. Works have also begun on the demolition and removal of the existing boundary wall at St Pauls. Site engineers have been scanning the area for existing services and marking up the works area in conjunction with service providers.

Next week, preparatory works will continue for new boundary walls at St Pauls. The first section of the drainage carrier pipe will be installed. This drainage line will be used for surface drainage water from the road. Pedestrian management plan will be implemented and these will be clearly signposted on site.
